The NHS Knowledge Mobilisation Framework provides a set of tools and techniques to help people to learn before, during and after everything they do so that good practice can be replicated and pitfalls are avoided.
Knowledge Mobilisation Framework

Healthcare is a knowledge-based industry. Sharing the ‘know-how’ of staff, using research evidence and implementing best practice are all business critical. Knowledge Mobilisation emphasises learning throughout an activity’s lifecycle: learning before, during and after:

- **Learning Before**
  - Who has done similar work before?
  - Who has worked with this client before?
  - Where have we got similar skills?

- **Learning During**
  - What have we learned so far?
  - Are we on track?
  - What did we anticipate correctly?
  - What did we not anticipate?

- **Learning After**
  - What did we deliver?
  - What did we achieve?
  - Did the outcome differ from our original goals?
  - If, how? What went well?
  - What went not so well?

The tools and techniques of the Knowledge Mobilisation Framework facilitate learning and support strategic planning, operational delivery and sustainability.
