

Knowledge Manager: Lead for Knowledge Mobilisation, Knowledge Translation Manager

Health Education England

Key aspects of role:

- Developing and leading on implementation of the Knowledge Management Strategy.
- Developing and maintaining Knowledge Management policies and protocols, systems and processes to ensure robust evidence underpins all decision-making
- Developing and embedding a Knowledge Management culture; building capability through partnership working and providing opportunities to ensure staff use knowledge effectively
- Identifying and commissioning knowledge products (e.g. databases, electronic journals, knowledge sharing tools) to support the use and dissemination of knowledge and innovation
- Developing effective use of the published literature - knowledge sharing by providing appropriate horizon scanning services, reports and digests that summarise and synthesize the best available evidence.
- Providing knowledge management support for evaluation of the benefits and impacts of organisational work programmes

Impact of role:

Knowledge Manager provides the intelligence to underpin a credible advisory service

The Knowledge Management Team supported the core work of Health Education England advising on quality improvement models and their impact upon workforce transformation.

"We are required to be system leaders and a 'go to' body, to both advise and steer provider system investment and actions – it is very difficult to do this credibly, without some degree of evidence/information to underpin, which often needs to be strong enough for persuasion"

Head of Workforce Transformation
